- Precision ‘Hysteresis’ type Synchron motor
- Attractive modern design
- Heavy-duty construction
- Impact-resistant black plastic case

GENERAL

The **american time™** Dual Motor Synchronous–Wired Corrective clocks are used with the YMP series or AllSync® master clocks to provide continuous accurate time indication. The secondary clocks are provided in **round only**, high impact black plastic cases with shatter-resistant, polycarbonate crystals and bold, black numerals and minute markers on a non-yellowing white dial. Stylish hour and minute hands are aluminum with a black finish and a red sweep hand. Other bezel colors available. Consult factory.

DESCRIPTION

american time™ clocks are flush mounted and are available in either 10" or 12" size. A 15-minute correction signal on the correction motor line will cause a 12-hour correction from 5:12:00 to 5:28:00. This will occur twice daily. Run motor power is connected during the 12-hour correction. A 29-second signal is applied to the correction motor line from XX:59:30 to XX:59:59 to cause hourly corrections. During hourly corrections, power is disconnected from the run motor. Flush mount clocks require a flush backbox. Each clock is supplied with a pair of Molex® connectors.
