**GENERAL**

**american time™** electric weather-resistant clocks are modern non-corrective clocks designed to be durable, dependable and easy to read. They are available in four sizes.

**DESCRIPTION**

Clock bezel is constructed of durable, 21 gauge cold rolled steel, manufactured to specific high quality standards, with a durable powder coat finish. Dials are laminated plastic to resist warping. Shatter-resistant plexiglass crystal resists scratching and discoloration. The hour and minute hands are black aluminum. Sweep second hand is red aluminum.

The 12" and 15" clocks include the AllSet movement with a 6' cord and rear reset, which automatically adjusts for Daylight Saving Time changes. The 18" and 24" clocks include a bottom reset movement with a 6' cord with 3 prong plug (no DST adjustment). The movements are protected inside an enclosure to prevent dust and water from getting in, ensuring problem-free operation.
