FYI Synchronous Wired Correction Protocol for Faraday 1300, 1400, 2330 and 2331 Series
120vac/24vac is used to operate the clocks normally. 120vac is furnished to the correction coil for 55 seconds each hour from XX:58:05 to XX:59:00 to cause hourly correction. Ten 120vac signals are furnished to the correction coil (each for 95 seconds) beginning at 5:05:00, 5:07:00, 5:09:00, 5:11:00, 5:13:00, 5:15:00, 5:17:00, 5:19:00, 5:21:00 and 5:23:00 to cause 12-hour correction. The nal 12-hour signal ends at 5:23:35.

Digital Replacements for Faraday

6 1/8" h x 12" w x 3 1/2" d

- Bright red LED display visible over 100'
- 4" hour and minute digits
- 12 hour correction
- 12 hour time format
- Capacitive backup (no batteries required). Keeps time for up to one hour during power outages
- Black anodized aluminum frame

These digital secondary clocks are designed primarily for use with the SET 1400/1401 Series Master Time Programmer or the SET 1402/1403 Program Time Controller. When connected to one of the 1400 Series time controls, and using an optional 24vdc power supply, the digital clocks will receive automatic corrections every 12 hours and for Daylight Saving Time adjustment.
