

8 Hang the Clock (continued)

Ceiling Mount

1. Make cable connections to the digital clock.
2. Using two #8-32 x 3/4" screws, hang double dial enclosure assembly using holes onto 4" square back box.

Global Series Power over Ethernet (PoE) Double Dial Digital Clocks

Please read this first!

If this is your first installation or you have questions at any time during this process, please call American Time toll free at **800-328-8996**.

1 Pre-Installation

1. Verify network infrastructure with Network Administrator.
 - Power over Ethernet (PoE) solution
 - Dynamic Host Configuration Protocol (DHCP) settings
2. Plan Digital PoE Clock locations and cabling routes

2 Unpack the box

- Remove the components from the box. Save the packing materials in case you need them later.

3 Check the contents

Your package contains:

- Digital Double Dial PoE clock
- Quick Start Guide
- Installation and Operation Manual
- USB Drive (optional) with Network Clock Connect Software—Part #H004167B-POE

NOTE FOR NON-INCLOUD CUSTOMERS: If your site is not using the inCloud Management Portal, disregard Step 4 and proceed directly to Step 5.

The inCloud Management Portal is a fast and intuitive tool for setting up, monitoring and managing American Time products. Get your devices up and running more quickly, efficiently manage their status, and easily make changes. inCloud includes features such as:

- Indicators for clock status and time sync
- Time server management
- Brightness, 12/24-hour display, and other settings and controls
- Default and custom configuration setups, to maintain consistent settings across all clocks

With the inCloud management portal you can set up, monitor and manage your American Time network clocks easily and from anywhere.

QUICK START INSTALLATION GUIDE

4 Configuring Clocks to the inCloud Portal

1. Navigate to the inCloud portal: incloud.american-time.com
Log in using the credentials supplied in the welcome e-mail from American Time.
2. Click on the green "Setup New" button in the PoE Devices bar on the Device List page.
This will open the Setup Network Device List, which will list all the clocks assigned to your site by American Time.
3. Find the clock's MAC address and provide a name and (if desired) description for the clock. Ideally, the name will identify the clock's location or otherwise make the clock easy to identify for management purposes. Repeat this for each clock in the list.
 - The MAC address can be searched using the last five characters of the address including the colon (for example, AA:11) in the search bar.
4. Once this is complete, all clocks will be listed under the Device List. To access this, click on Devices in the site menu.
5. After the clock has been named, the clock can be set up and configured as described in the following steps.

5 Set up the Clock

1. To power up the clocks, connect CAT 5 or higher Ethernet cables (A) to a PoE switch (Fig. 1) or single injector (Fig. 2). The time should display in 20-40 seconds.
 - PoE Switch (Fig.1) - Check with network administrator for infrastructure needs. This part is not supplied by American Time.
 - PoE Injector (TMA200) (Fig. 2) - This is an optional power source that may be purchased from American Time.

Note: When a DHCP network is not present at initial start up, the PoE clock will default to a random Static IP in the range of 169.254.1.0 to 169.254.254.255.

For more details reference the **PoE Analog and Global Series Digital Manual**.
Navigate to: [SUPPORT > PRODUCT DOCUMENTATION > select MANUAL > type PoE in searchbox > SEARCH](#) – Click on **PoE Analog and Global Series Digital Manual**.

POWER OVER ETHERNET DIGITAL CLOCKS

6 Adjustments via Network Clock Connect

NOTE: inCloud users should only use Network Clock Connect for programming schedules. All other settings should be configured within the inCloud clock configurations.

1. Download **Network Clock Connect**. Find it online: american-time.com
Navigate to: [SUPPORT > PRODUCT DOCUMENTATION > select FIRMWARE > SEARCH](#)
Click on **Network Clock Connect**.
The software will automatically download. It is also available from the optional USB Drive (H004167B-POE, purchased separately).
 2. Install Network Clock Connect application – Password = clock4u (default)
 3. Network Clock Connect will allow you to configure:
 - Network address settings
 - Time Synchronization settings
 - Daylight Saving Time settings
 - Schedules (Buzzer clocks) - maximum of 100 scheduled events
- For more details, reference the **PoE Analog and Global Series Digital Manual**.

7 Hang the Clock

Wall Mount

1. Make cable connections to the digital clock.
2. Using #8-32 x 3/4" screws, hang double dial enclosure assembly according to one of the following:
 - 4 square junction box – install lower screw into back box, hang clock by keyhole, install upper screw
 - Single gang box – install lower screw into back box, hang clock by keyhole, install upper screw
 - Double gang box – Install two lower screws into back box, hang clock by keyhole, install upper screw

A=PoE connection (CAT 5 or higher Ethernet patch cable)
