

### FEATURES

- Bright zinc plated
- Epoxy lacquer clear coat
- Multiple sizes
- Constructed with heavy gauge rods

4900

### GENERAL

**american time**<sup>®</sup> guards are designed to protect your equipment from inadvertent damage while maintaining optimum visibility. ATS stocks a wide variety of shapes and sizes for immediate delivery to you. Ask your customer service representative about our custom guards manufactured for the unique products you want to protect. Measurements are inside dimensions.

### DESCRIPTION

**american time**<sup>®</sup> guards are plated and clear coated for corrosion resistance and optimal appearance. The finish on the guards is designed for protection wherever they are used, internal or external. Some of the guards are hinged for easy access to the product after attachment to the wall. Mounting hinges can be added to all other guards for additional cost. Call our customer service representatives for pricing. AT guards are manufactured with #3 gauge, (approx. .250" diameter), #6 gauge (approx. .200" diameter) or #8 gauge (approx. .150" diameter) wire material. Wire guards have welded tabs with mounting holes (designed to accept .250" diameter fastening lags, bolts or screws) or looping foot attachments for easy installation.

### ORDERING INFORMATION

#### Model 4900
