# AllSync Plus ${ }^{\circledR}$ Surface and Double Dial Molded Case 

## american time. Integrated Solutions

## DESCRIPTION

The American Time ${ }^{\circledR}$ AllSync Plus clocks are provided in round only high impact black plastic cases with clear polycarbonate crystals and bold, black numerals and minute markers on a non-yellowing white dial. Stylish hour and minute hands are aluminum with a black finish and a red sweep hand. Plastic case (bezel) also available in white or brown.

AllSync Plus clock are designed to work with multiple master clocks and correction signals. This unit is programmed to identify the signal it receives from the master and operate as that style of clock. Changing clock operation from one style to another is as easy as unplugging the clock from one system and plugging it into another. If needed, changing the placement of two small jumpers on the circuit board can change the voltage required to run this clock from 120 vac to 24 vac or 24 vac to 120 vac . This clock provides 15 minutes of backup run power without the use of batteries. If a power outage should last longer than 15 minutes, the clock will synchronize to the master clock at the hourly and 12 hour correction cycles.

## Correction Signals

Works on:

- Hourly correction: 7-9 seconds starting at the 57th minute and 54th second. 12 hour correction: 13-18 seconds starting at 5:57:54 (am and pm).
- Hourly correction: 24-28.5 seconds starting at the 0 minute and 0 second. 12 hour correction: 24-32 minutes starting at 6:00:00 (am and pm).
- *Hourly correction: 54-56 seconds starting at the 58 th minute and 5 th second. 12 hour correction: 10 pulses of 94-96 seconds starting at 5:05:00 (am and pm) and repeating every 2 minutes.
- Hourly correction: 24-26 seconds starting at 0 minute and 0 second. 12 hour correction: 25 pulses of $24-26$ seconds starting at 6:00:00 ( am and pm ) and repeating every 60 seconds.
- Hourly correction: 63-67 seconds starting at the 58 th minute and 0 second. 12 hour correction: 14 pulses of 63-67 seconds starting at 5:06:00 (am and pm) and repeating every 2 minutes.
- *Hourly correction: 54-56 seconds starting at the 58th minute and 5th second. 12 hour correction: 12 pulses of 63-67 seconds starting at 5:05:00 (am and pm) repeating every 90 seconds.

## *Note:

When switching between these correction protocols, you must use a different correction protocol to complete the transition. The AllSync Plus clock needs to distinguish between hourly corrections before it can change correction protocols internally.

## COMPLIANCE

- FCC Part 15 Class B
- ICES-003

## SPECIFICATIONS

- 120vac $50 / 60 \mathrm{~Hz}$ or $24 \mathrm{vac} 50 / 60 \mathrm{~Hz}$
- Current draw: Single dial:

| Maximum operating voltage: | 24vac setting = 32vac |
| :--- | :--- |
| 120vac setting = 140vac |  |
| Minimum operating voltage: | 24 vac setting = 18vac |
|  | 120 vac setting = 105vac |

$120 \mathrm{vac}, 3$ watts, .028 amp
Double dial:
24vac, 2 watts, . 086 amps
120vac, 6 watts, .056 amps

## Note:

Double dial mounting requires a 4" square electrical box in the wall or ceiling. Surface clocks have a molded in hanger in the plastic case used to secure the clock to a bracket (pictured below) to a single gang electrical box.

Note: 12" surface mount clocks include security bracket.
