

SiteSync IQ® Wireless Signal Indicator

The SiteSync IQ Wireless Signal Indicator allows the user to monitor the wireless signal from the transmitter of the SiteSync IQ system controller. The Signal LED flashes green to indicate the system controller is transmitting a signal. A red LED indicates no signal reception from the system transmitter (attention is required to check system operation).

SPECIFICATIONS

Power	One 9volt battery (included)
RF Frequency	450-470 MHz (factory set)
Receiver Sensitivity	-110dBm
Operating Temperature Range	41 °F to 131 °F
Relative Humidity	0%-95% non-condensing
Antenna Type	External
Warranty	2 Years

Part # H004292

The four Signal Strength LEDs are used to represent the RSSI (Received Signal Strength Indication) value at the location of last reception. These LEDs will remain on for 20 seconds after the last page received.

- 4=Excellent
- 3=Good
- 2=Adequate
- 1=Weak
