

PoE – IP Network Clocks *Helping solve your timekeeping needs*

PoE clocks are today's energy-efficient standard in synchronized time, receiving both power and time updates through one cable connected to your facility's Ethernet. No AC outlets are needed, eliminating cost and complexity from system deployment.

Features

- Draw both power and time updates from the network
- Use any SNTP server as a time source
- Easy plug and play installation
- Reliable – fewer wires means less signal noise
- Built in buzzers (optional)
- Elapsed Time Indicator (optional)*
- Code Blue Activation (optional)*

Clock Specifications

- Time zone management
- Automatic Daylight Saving Time adjustment
- 12/24 hour mode
- Power over Ethernet IEEE802.3af Standard
- DHCP or Static IP addressing
- Network Clock Connect software

* For this functionality, must purchase Timer Control Station

Schedule multiple clocks with Network Clock Connect

This application allows the user to quickly manage all of the compatible network clocks installed on the network. Max # of events is 100.

140 3rd St. So., PO Box 707
Dassel, MN 55325-0707
