

inCloud Management Portal

Manage network devices easily and from anywhere.

The new inCloud management portal is a fast and intuitive tool for setting up, monitoring and managing American Time IoT products, like network clocks and EverAlert displays and equipment. Get your devices up and running more quickly, efficiently manage their status, and easily make changes.

Learn how to improve clock management and reduce wasted time with inCloud. Watch these videos to learn more.

inCloud is the Advanced Management Portal for these American Time Solutions

EverAlert Communication System

- Set-up, manage and monitor EverAlert equipment, including Dynamic Displays, Dynamic Views, and Integrators
- Intuitively see all users, notification and action audits, and license status
- Customize and send instant messages
- Customize and save commonly used messages – no need to update details each time!
- Manually deploy alarms
- Schedule bells and audio alerts
- Monitor and report on all equipment and user activity that occurs on the system
- Receive automated device status reports on a daily, weekly, or monthly schedule

PoE Clocks

- Monitor time synchronization, status and firmware versions
- Set up configurations and provision to a few clocks or all
- Change brightness and 12/24-hour mode of digital clocks
- For international organizations, easily adjust time zones
- Manage time server
- Receive automated device status reports on a daily, weekly, or monthly schedule

Wi-Fi Clocks

- No need to manually enter network information for every clock; American Time can pre-configure your clocks to your network settings before we ship them
- Create Wi-fi clock configuration and push settings to a few clocks or all
- Monitor Wi-Fi connection strength, time synchronization and battery life
- Update Wi-Fi password for all clocks
- Change brightness and 12/24-hour mode of digital clocks
- For international organizations, easily adjust time zones
- Manage time server and network assignments
- Receive automated device status reports on a daily, weekly, or monthly schedule
