

The EverAlert StationSOS is a proprietary, multi-purpose push-button device designed to seamlessly integrate with the EverAlert communication system. This surface-mounted, self-contained unit serves as a reliable emergency notification tool. When activated, it instantly triggers an alert message across all assigned EverAlert displays at the site and simultaneously sends text and/or email notifications to designated personnel. For enhanced safety coverage, multiple StationSOS units can be strategically placed throughout a building.

FEATURES

- **Single-Action Activation:** Initiates pre-configured emergency alerts and lockdown scenarios with a simple push-button.
- **Cloud-Managed Integration:** Connects directly to the inCloud Management Portal for reliable communication and remote management.
- **Power over Ethernet (PoE):** Powered and connected via a single RJ45 Ethernet cable, simplifying installation and wiring (IEEE 802.3af compliant).
- **Accidental Activation Prevention:** Features a hinged, clear polycarbonate shield covering the main activation button.
- **Secure & Simple Reset:** Utilizes turn-to-reset mechanism to restore the station to a ready state after activation.
- **Durable Construction:** Built with a rugged polycarbonate housing to ensure reliability in demanding environments.
- **Secure Installation:** Includes a surface-mount backbox with an integrated keylock to secure all wire connections against tampering.
- **ADA-Compliant Design:** Meets the standards of the Americans with Disabilities Act for accessibility.
- **Certified for Use:** Meets FCC Part 15 and ICES-003 Class B certification standards.
- **Warranty:** 1-year
